SUMMARY OF INDUSTRY

The expansion of India’s services sector has been closely linked to the economic reforms of the 1990s. While the sector began to grow in the mid-1980s, it gained significant momentum after India initiated a series of structural reforms in response to a severe balance of payments crisis. Today, the services sector is not only the largest contributor to India’s GDP but also a major driver of employment, foreign investment, and exports. It encompasses a wide range of activities, including trade, hotels and restaurants, transport, storage and communication, finance, insurance, real estate, business services, community and personal services, and services associated with construction.

To enhance India’s share in the global services market from 3.3% and enable multi-fold growth in GDP, the government has implemented several initiatives to strengthen commercial services exports. As a result, India’s services exports stood at approximately Rs. 20,40,317 crore (US\$ 237.55 billion), while imports were Rs. 10,20,974 crore (US\$ 118.87 billion), highlighting India’s strong position in global trade. The services trade surplus of Rs. 10,19,343 crore (US\$ 118.68 billion), up from Rs. 8,71,698 crore (US\$ 101.49 billion) in FY25 (April-October 2024).

India’s services sector has steadily increased its share of Gross Value Added, rising from 50.6% in FY14 to about 55.3% in FY25, with an average growth of 8.3% since FY23. The sector also ranked first in attracting Foreign Direct Investment, according to data from the Department for Promotion of Industry and Internal Trade. India’s unique skills and competitive advantage in knowledge-based services, supported by initiatives such as Smart Cities, Clean India, and Digital India, have created a conducive environment for growth and innovation.

SECTION II – RISK FACTORS

Investment in the Equity Shares involves a high degree of risk. You should carefully consider all of the information in this Draft Prospectus, including the risks and uncertainties described below and the Financial Statements incorporated in this Draft Prospectus, before making an investment in the Equity Shares of our Company. Any potential investor in, and subscribers of, the Equity Shares should also pay particular attention to the fact that we are governed in India by a legal and regulatory environment which in some material respects may be different from that which prevails in other countries. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the risks involved. If any or some combination of the following risks occur or if any of the risks that are currently not known or deemed to be not relevant or material now, actually occur, our business, prospects, financial condition and results of operations could suffer, the trading price of the Equity Shares could decline, and you may lose all or part of your investment. For further details, please refer to chapters titled “Business Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 107 and 193, respectively of this Draft Prospectus, as well as the other financial and statistical information contained in this Draft Prospectus. If our business, results of operations or financial condition suffer, the price of the Equity Shares and the value of your investments therein could decline.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality therein:

- *Some risks may not be material at present but may have a material impact in the near future.*
- *Some risks may not be material individually but may be found material when considered collectively*
- *Some risks may have material impact qualitatively and not quantitatively and vice-versa*

We have described the risks and uncertainties that our management believes are material, but these risks and uncertainties may not be the only ones we face. Additional risks and uncertainties, including those we are not aware of, or deem immaterial or irrelevant, may also result in decreased revenues, increased expenses or other events that could result in a decline in the value of the Equity Shares and may also have an adverse effect on our business. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in the Equity Shares.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. For further details, please refer to chapter titled “Forward-Looking Statements” beginning on page 14 of this Draft Prospectus.

Unless otherwise indicated, all financial information included herein are based on our Financial Statements. Please refer to the section titled “Restated Financial Statements” beginning on page no. 158 of this Draft Prospectus.

INTERNAL RISK FACTORS:

- 1. *Our Company is subject to periodic inspections and ongoing compliance requirements prescribed by NABCB, and any observations or changes in accreditation requirements may require corrective actions and could affect our operations.***

NABCB conducts periodic annual inspections of our Company to assess compliance with applicable accreditation norms and regulatory standards. As part of this inspection process, NABCB reviews our Quality and Procedure for Inspection (“QPI”) systems, inspection methodologies, documentation practices, and implementation of prescribed procedures, and may issue GAP analysis reports highlighting observations, non-conformities, or areas requiring improvement, if any.

Our Quality System / Inspection procedure was last revised on April 07, 2022. Up to the date of the latest NABCB inspection, no gaps, non-conformities, or adverse observations have been reported by NABCB in relation to our inspection management system procedures. However, there can be no assurance that future inspections will not result in observations or recommendations requiring corrective or preventive actions within specified timelines.

Further, NABCB may revise or introduce additional accreditation requirements, inspection criteria, or compliance standards from time to time. Compliance with such revised requirements may involve additional procedural changes, employee training, system upgrades, or administrative efforts. While our management undertakes regular internal reviews and strives to maintain compliance with applicable accreditation norms, any delay in implementing corrective measures, inability to meet revised standards, or adverse inspection outcomes could impact our accreditation status, affect client confidence, and have an adverse effect on our business operations, financial performance, and reputation. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

2. Dependence on Third-Party NABL Accredited Laboratory

Our Company currently does not hold accreditation from the National Accreditation Board for Testing and Calibration Laboratories (“NABL”). Certain testing and inspection assignments undertaken by us require testing to be carried out through laboratories accredited by NABL in order to comply with applicable industry standards and client requirements.

In order to facilitate such services, the Company has entered into a Memorandum of Understanding dated February 05, 2025 with Industrial Testing Center Private Limited, an NABL-accredited laboratory based in Ahmedabad, for conducting Non-Destructive Testing (NDT) on behalf of the Company. The arrangement has been entered into for a period of three (3) years commencing from February 05, 2025, pursuant to which Industrial Testing Center Private Limited provides NABL-accredited laboratory testing support for assignments executed by our Company. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

Our ability to provide certain inspection and testing services that require NABL-accredited laboratory support is therefore dependent on the continuation and effectiveness of this arrangement. In the event that the agreement with Industrial Testing Center Private Limited is terminated prior to expiry, or is not renewed upon its expiration, or if such laboratory fails to maintain its NABL accreditation, we may be required to identify and engage an alternative NABL-accredited laboratory or obtain such accreditation ourselves. Such actions may involve additional time, costs and operational adjustments.

Any disruption in the availability of NABL-accredited laboratory services may affect our ability to execute certain assignments within the stipulated timelines and may lead to delays in project execution, loss of potential business opportunities or reputational risks. Consequently, such circumstances may have an adverse effect on our business operations, financial condition and results of operations.

3. *We have executed a Banakhat (agreement to sell) for the proposed purchase of office premises as part of our business expansion plan. Any delay or failure in completing the execution and registration of the final sale deed within the stipulated time may adversely affect the implementation of our expansion plans and may consequently have an adverse impact on our business operations, profitability and reputation.*

One of the objects of the Issue is to acquire a larger office premises in order to support our business expansion programme. In this regard, our Company has executed a Banakhat / Registered Agreement to Sell dated October 09, 2025 with M/s. Swatisandhya Procon LLP, Ahmedabad for the purchase of Commercial Unit No. A-1110, situated on the 11th Floor in “A” Block, admeasuring approximately 186.93 sq. mtrs. carpet area, in the project known as “Swati-18”, constructed on non-agricultural land bearing Sub-Plot No. 2 admeasuring 10,000 sq. mtrs., situated on land bearing Final Plot No. 5 of Town Planning Scheme No. 1 (Thaltej), Ghatlodia, Ahmedabad.

The agreed purchase consideration for the said premises is ₹ 3,50,14,450 (Rupees Three Crore Fifty Lakh Fourteen Thousand Four Hundred Fifty Only) without GST, Registration charges and stamp duty. Out of the total consideration, our Company has paid ₹ 17,50,722 as advance payment plus GST, and the balance amount of ₹3,32,63,728 is payable in a phased manner in accordance with the terms and conditions specified in the agreement to sell. *For further details, please refer to the chapter titled “Objects of the Issue” on page 73 of this Draft Prospectus.*

The completion of the transaction and handover of possession are subject to the fulfilment of the terms and conditions set out in the agreement to sell, including timely completion of the project by the developer. In the event, if, there is any delay in completion of the project, execution of the final sale deed, or handover of possession of the premises as per the schedule mentioned in the agreement to sell, our proposed expansion plans may be delayed to that extent.

Any such delay or failure in acquiring and occupying the proposed premises may disrupt our operational planning and may adversely affect our business operations, financial condition, and profitability.

4. ***We are required to furnish bank guarantees for certain contracts, and any failure to provide or maintain such guarantees may adversely affect our ability to execute such contracts and may impact our financial condition.***

In the ordinary course of our business as a third-party inspection and testing service provider, we undertake assignments from various public sector undertakings. In connection with such contracts, we are required to furnish **bank guarantees**, as specified in the respective contracts, work orders or agreements, to secure our performance and ensure compliance with our contractual obligations. The value of such bank guarantees is determined in accordance with the terms and conditions of the respective contracts and may vary depending on the nature and size of the assignment.

The requirement to furnish such bank guarantees may require us to utilize our existing banking limits and, in certain cases, provide margin money or collateral to the issuing banks. This may result in the blocking of a portion of our financial resources and may limit the availability of funds for other operational requirements. If the number or value of such guarantees increases significantly, it may place constraints on our working capital and borrowing capacity.

Further, in the event we fail to meet the performance standards, timelines or other contractual obligations stipulated under such contracts, the concerned company may invoke the bank guarantees furnished by us. Any such invocation may result in financial liabilities and may adversely affect our cash flows and financial position and our reputation.

Additionally, if we are unable to arrange bank guarantees for existing or future contracts due to limitations in banking facilities, collateral requirements or other factors, our ability to participate in tenders or secure contracts from public sector entities may be adversely affected.

Accordingly, any invocation of bank guarantees or inability to provide or maintain such guarantees for our contracts may adversely affect our reputation, liquidity, financial condition and our ability to secure or execute future contracts, which may consequently have an adverse effect on our business operations and results of operations. Till date no bank guarantee provided by the Company is invoked by any client. However, we cannot assure that in future the bank guarantee will not be invoked by the clients in case of failure in performance of contract terms. *For further details, please refer to the chapter titled “Restated Financial Statements” on page 153 of this Draft Prospectus.*

5. ***Our business depends significantly on the accuracy and reliability of inspection and testing results, and any error or deficiency in our inspection reports may expose us to reputational risks and potential liabilities.***

Our Company is engaged in providing third-party inspection, verification and testing services to clients operating across various industries. The services provided by us involve examining materials, equipment, structures, processes or systems and issuing inspection reports, test results or certifications based on our observations and professional assessment. Our clients rely on such reports and test results for quality assurance, regulatory compliance, project approvals, operational decisions and contractual obligations. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

The accuracy, reliability and credibility of the inspection and testing results issued by us are therefore critical to our business. Any error, omission, deficiency or delay in the inspection reports or test results issued by us, whether due to human error, equipment malfunction, improper calibration of instruments, incorrect interpretation of technical standards, limitations in information provided by clients, or other operational factors, may affect the reliability of such reports.

If any inspection report or certification issued by us is found to be inaccurate, incomplete or deficient, it may lead to disputes with clients or other stakeholders who rely on such reports. Such situations may require re-inspection, rectification, or may expose us to claims, contractual disputes, reputational damage or potential legal liabilities. Further, any adverse perception regarding the reliability or quality of our services may lead to loss of existing clients or difficulty in securing new assignments.

Any such occurrence may adversely affect our reputation in the market, our relationships with clients and our ability to secure future contracts. Consequently, this may have an adverse effect on our business operations, financial condition and results of operations.

6. *Our inspection and testing activities depend on the proper calibration and functioning of equipment and instruments, and any failure to maintain accurate calibration may affect the quality and reliability of our inspection services.*

Our business as a third-party inspection and testing service provider relies significantly on the use of specialized inspection instruments, testing equipment and measurement devices. The accuracy and reliability of the inspection results generated by such equipment depend on periodic calibration, maintenance and adherence to prescribed technical standards.

If any of our inspection or testing equipment is not calibrated properly, not calibrated within the required time intervals, or develops technical defects, the accuracy of the inspection results may be affected. Inaccurate measurements or testing results may lead to errors in inspection reports, which could impact the quality and credibility of our services. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

Any such deficiencies in calibration or equipment performance may result in client dissatisfaction, rejection of inspection reports, requirement for re-inspection, contractual disputes, or reputational damage. Further, it may expose us to potential liabilities or loss of business from existing or prospective clients.

Accordingly, any failure to maintain proper calibration, maintenance or functioning of our inspection equipment may adversely affect the quality of our services, our reputation, and consequently our business operations, financial condition and results of operations.

7. *Our Memoranda of Understanding with Industrial Testing Center Private Limited has not been executed on adequate stamp paper and may therefore be required to be stamped in accordance with applicable laws, failing which such documents may not be admissible as evidence in legal proceedings.*

In the ordinary course of our business, we have entered into a **Memorandum of Understanding (“MoU”) with Industrial Testing Center Private Limited**, an NABL-accredited laboratory. Such document has not been executed on stamp paper of the value prescribed under the applicable stamp duty laws. The parties mutually agreed to execute the MoU on a plain paper and recorded the agreed terms and conditions without the use of stamped paper. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

Under the provisions of the Indian Stamp Act, 1899 and applicable State stamp laws, instruments that are not duly stamped may be required to be validated by payment of the applicable deficit stamp duty together with penalties before they can be admitted as evidence in legal proceedings. Until such payment is made, such documents may not be relied upon or admitted as evidence by a court or other competent authority.

In the event of any dispute arising in relation to such agreements, we may be required to pay the applicable deficit stamp duty and penalties in order to enforce our rights under such documents. Any requirement to regularize such documents may result in additional costs and administrative efforts.

Accordingly, any inability to enforce rights arising from such arrangements or any requirement to pay additional stamp duty and penalties may adversely affect our business operations, financial condition and results of operations.

8. *Our business may be adversely affected by changes in industry standards, technical regulations or compliance requirements.*

Our operations in the third-party inspection and testing industry are subject to various industry standards, technical specifications, regulatory frameworks and compliance requirements prescribed by governmental authorities, regulatory bodies, industry associations and accreditation agencies. Our services are required to be performed in accordance with these applicable standards, guidelines and protocols, which may vary depending on the industry segment, type of inspection or testing services being provided and the jurisdiction in which the services are rendered.

From time to time, such industry standards, technical requirements and regulatory frameworks may be revised,

updated or replaced to address evolving safety norms, technological advancements, environmental considerations or quality assurance requirements. Any changes in these standards or regulatory requirements may require us to modify our operational procedures, adopt new testing methodologies, upgrade or replace certain equipment and infrastructure, or obtain additional certifications, approvals or accreditations from relevant authorities.

In addition, we may be required to provide additional training and skill development to our technical personnel in order to ensure compliance with revised technical protocols or regulatory expectations. These changes may result in increased capital expenditure, higher operating costs, administrative efforts and potential disruptions to our existing processes during the transition period.

Further, if we are unable to promptly and effectively adapt to such changes in industry standards, regulatory frameworks or compliance requirements, our ability to provide certain services may be restricted or delayed. Non-compliance with applicable standards or regulatory requirements may also expose us to penalties, suspension or cancellation of certifications or accreditations, loss of client confidence or reputational damage.

Any such developments could adversely affect our business operations, financial condition, results of operations and growth prospects.

9. *Our Registered office premises is not owned by the Company and are taken on lease from our Promoters and Directors. Any non-renewal or termination of such lease arrangement may adversely affect our business operations.*

Our Registered Office is situated at 910, Gala Empire, Opp. Tv Tower, Drive in Road, Thaltej Road, Ahmedabad, Gujarat, 380054, India. The said premises is not owned by our company and have been taken on lease basis for a period of 11 months and 29 days commencing on April 01, 2025 to March 31, 2026 from Jaykumar Bhavsar and Shri Bhagirath Punjalal Bhavsar, promoters and Directors of our company at a monthly rent of Rs.1,00,000/-. This lease arrangement may be renewed or extended by mutual agreement in writing between the parties, if desired. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

There can be no assurance that on completion of lease period the term of the agreements will be renewed and in the event the lessor/licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we may require to vacate the registered office premises, and to identify alternative premises and enter into fresh lease or leave and license agreement. Such a situation could result in loss of business, time overruns and may adversely affect our business operations and profitability.

Further, since the premises are leased from our Promoters and Directors, the lease arrangement constitutes a related party transaction and the concerned Promoters and Directors have an interest in such arrangement.

Any such disruption or relocation of our registered office may adversely affect our business operations, financial condition and results of operations.

10. *Our business may be affected by delays, disruptions or restrictions at project sites or client locations where inspection activities are conducted.*

Our inspection and testing services are generally performed at client facilities, manufacturing plants, project locations, construction sites or other operational premises where the relevant equipment, materials or processes are located. As a result, the execution and timely completion of our assignments depend significantly on our ability to obtain timely access to such sites and on effective coordination with clients, contractors, project owners and other stakeholders involved in the project.

The progress of our assignments may be affected by various factors that are beyond our control, including delays in project schedules, restricted access to project locations, safety concerns at the site, operational shutdowns, labour issues, logistical constraints, regulatory restrictions or other unforeseen circumstances at client premises. Additionally, delays in readiness of equipment or materials for inspection, or changes in project timelines by clients, may also impact the scheduling and execution of our inspection activities.

Any such delay or disruption at project sites may lead to postponement or rescheduling of our inspection assignments. This may result in underutilization of our technical personnel, delays in revenue recognition, additional operational costs or potential loss of business opportunities. In certain cases, prolonged project delays may also lead to cancellation or reduction of inspection assignments.

Accordingly, any delays, disruptions or operational issues at client sites where our services are performed may adversely affect the timely execution of our assignments and may consequently have an adverse effect on our business operations, financial condition and results of operations.

11. Our business is subject to regulatory and accreditation requirements applicable to third-party inspection and certification service providers, and any failure to obtain, maintain or renew necessary approvals, certifications or accreditations may adversely affect our operations and revenue.

Our Company operates in the third-party inspection, audit and certification support services industry. In the course of providing inspection and verification services to our clients, we are required to comply with various regulatory requirements, industry standards and accreditation norms prescribed by governmental authorities, regulatory bodies and accreditation agencies. Certain assignments undertaken by us may require specific certifications, authorizations, recognitions or approvals from relevant accreditation bodies or regulatory authorities, and our ability to undertake or continue such assignments may depend on our ability to obtain, maintain and renew such approvals in a timely manner.

As a third-party inspection service provider, our operations are subject to compliance with various technical standards, audit protocols, and operational guidelines prescribed by national and international accreditation bodies, including organizations such as the National Accreditation Board for Certification Bodies. These accreditation bodies establish stringent requirements relating to quality management systems, technical competence, independence and impartiality in inspection processes, as well as documentation practices and record maintenance.

While we do not currently maintain in-house NABL certification, we ensure that our operational processes, documentation, and record-keeping practices are maintained in accordance with applicable industry standards and regulatory expectations.

In order to comply with such accreditation requirements, we are required to maintain technically qualified and trained personnel capable of performing inspection, audit and verification activities across various industry segments. We are also required to maintain adequate documentation, inspection records, reports and supporting evidence for assignments performed by us in accordance with prescribed standards and regulatory expectations.

Failure to comply with applicable regulatory or accreditation requirements may result in suspension, withdrawal, restriction or non-renewal of certifications, authorizations or recognitions granted to us by relevant accreditation bodies or regulatory authorities. Any such suspension, delay or inability to obtain or renew the required certifications or approvals may limit the scope of services we are able to offer, restrict our participation in certain projects or assignments, or affect our credibility with clients and industry stakeholders.

Further, maintaining such certifications and accreditations may involve periodic audits, assessments and compliance reviews by accreditation bodies, which may require additional operational efforts, investments in training, and adherence to evolving technical standards. If we are unable to effectively comply with such requirements or adapt to changes in regulatory or accreditation frameworks, our business operations, reputation, financial condition and results of operations may be adversely affected.

While we have not experienced any suspension, withdrawal or loss of authorization from accreditation bodies in the past, there can be no assurance that such circumstances will not arise in the future.

12. Our business growth and sustainability dependent on Continuous Employee Training and Skill Updates

Our operations and service quality depend significantly on our employees remaining updated with the latest developments, technologies, tools, and industry practices relevant to the sectors in which our clients operate. To maintain high standards of inspection, testing, and certification, the Company periodically organizes structured training programs for field staff, survey personnel, and other employees whenever there are updates in technology, regulatory requirements, or inspection procedures.

These training programs are designed not only to improve technical knowledge and problem-solving abilities but also to reinforce the Company's core values and Code of Integrity. Through scenario-based learning and practical exercises, employees are encouraged to apply their knowledge in real-world situations, ensuring that our services remain accurate, timely, and aligned with client expectations.

Participation in these training programs is mandatory for all employees, and the Company maintains detailed records of attendance and completion to ensure compliance. While these initiatives help enhance employee competence, motivation, and engagement, they require a substantial investment of both financial resources and employee time. The Company dedicates significant man-hours and incurs sizable expenses in conducting these programs, which are necessary to preserve our service quality, uphold our brand reputation, and maintain market credibility.

Regular training and upskilling are critical to the Company's ability to stay competitive and deliver reliable inspection and certification services. Any failure to adequately train employees could affect service efficiency, accuracy, and client satisfaction, which may, in turn, have an impact on our operational performance and reputation. Though the Company has not faced any such failure but cannot assure for the future.

13. *We have to rely on the services, integrity and expertise of our outsourced agency.*

Our Company operates in the services sector, providing inspection, auditing, certification, testing, and training services across a diverse range of industries and geographical regions. In order to meet the specialized requirements of our clients and the scope of certain projects, we periodically engage external experts, agencies, or subcontractors to support our operations.

While we follow a careful selection process to ensure that such outsourced agencies possess the required technical expertise, experience, and professional competence, the Company cannot fully guarantee that the integrity, ethical standards, or performance of these external parties will always align with our expectations. Any failure or lapse on the part of an outsourced agency or external expert in conducting inspections, audits, or certifications in a professional, impartial, and ethical manner could adversely affect our reputation, client trust, business operations, and profitability. Though the Company has not faced any such failure but cannot assure for the future.

14. *The Company continually monitors the performance and compliance of all outsourced agencies to mitigate such risks and ensure that the quality and reliability of our services remain consistent. Frequent changes in ISO standards require re-training auditors and updating processes, increasing compliance costs and risk of delays.*

Our Company's operations and service delivery are guided by internationally recognized standards, including ISO standards for quality management, environmental management, occupational health and safety, and inspection processes. These standards are periodically revised by the respective standard-setting bodies to reflect advancements in technology, evolving industry practices, and updated regulatory requirements.

Any revision or update to these standards may require the Company to undertake significant changes in its internal processes, procedures, and documentation. Additionally, it may necessitate retraining of personnel, recalibration of equipment, and updating of inspection and reporting methodologies to ensure ongoing compliance. These activities may result in increased operational costs, additional man-hours, and potential delays in service delivery.

The Company has implemented structured monitoring systems and compliance protocols to track changes in ISO standards and ensure timely adoption. Training programs are conducted to keep employees abreast of new requirements, and internal audits are carried out to ensure alignment with updated standards. Despite these measures, there can be no assurance that the Company will not encounter challenges in implementing changes immediately, which may temporarily impact operational efficiency or service timelines.

Failure to comply with revised ISO standards could adversely affect the Company's eligibility for certain tenders, its ability to provide certified inspection and auditing services, and client confidence in our services. This, in turn, could have a material adverse effect on our reputation, business operations, and financial performance. Though the Company has not faced any such failure but cannot assure for the future.

15. *Dependence on Skilled Auditors and Inspection Personnel*

Our Company's operations are dependent on skilled personnel, particularly qualified ISO auditors and inspection staff, who are critical to maintaining the quality, accuracy, and credibility of our services. Skilled auditors are in high demand, have limited availability in the market, and generally command higher compensation due to their expertise and ethical standards. Consequently, the Company incurs significant costs to attract, retain, and compensate such personnel.

Additionally, the rapid expansion of our business without the availability of adequately qualified audit and inspection staff may increase the risk of errors in inspections, audits, and certifications. Any such errors could adversely affect our service quality, client confidence, and overall brand reputation.

Our financial stability may also be impacted by delays in client payments or reliance on a limited number of large clients for revenue. While the Company has never faced such situations in the past, these operational and financial risks, if realized, could have a material adverse effect on our reputation, business operations, and profitability.

16. *The sizable portion of revenue is generated from the state of Gujarat, any adverse development affecting our operations in the state could have an adverse impact on our business, financial condition and results of operations.*

A significant portion of our revenue from operations is derived from certain states in India, particularly Gujarat. Revenue generated from Gujarat accounted for 28.58%, 31.64%, 32.09% and 23.88% of our total revenue from operations for the six months period ended September 30, 2025 and for the financial years ended March 31, 2025, March 31, 2024 and March 31, 2023, respectively. Consequently, our business performance is, to a certain extent, dependent on economic conditions, industrial activity, infrastructure development, and regulatory policies in this region. Any adverse developments in Gujarat, including a slowdown in industrial activity, changes in regulatory policies, or reduced capital expenditure by our clients in the region, could have an adverse effect on our business, financial condition, and results of operations. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

Any adverse developments in these regions, including slowdown in industrial activities, reduction in capital expenditure by clients, regulatory changes, or increased competition, may adversely impact our ability to generate revenue from such regions. Although we continuously strive to expand our geographical presence across multiple states and diversify our client base, there can be no assurance that we will be able to reduce our dependence on certain key regions in the future. While the Company has never faced such situations in the past Any decline in business activities in these regions could have a material adverse effect on our business, financial condition, and results of operations.

17. *Our international revenue has fluctuated in the past and currently constitutes a relatively small portion of our total revenue.*

Our Company has undertaken certain assignments in international markets in the past and has provided services to clients located in various countries. However, the contribution of revenue from international operations to our total revenue has fluctuated significantly during the periods and currently represents a relatively small proportion of our overall revenue.

For the six months period ended September 30, 2025 and the financial years ended March 31, 2025, March 31, 2024 and March 31, 2023, revenue from international operations amounted to ₹1.23 lakhs (0.07%), ₹65.12 lakhs (1.83%), ₹83.61 lakhs (3.62%) and ₹171.15 lakhs (13.07%) respectively, out of total revenues of ₹1,664.38 lakhs, ₹3,560.82 lakhs, ₹2,325.99 lakhs and ₹1,308.97 lakhs for the respective periods.

The level of our international business depends on several factors, including the availability of overseas projects, client requirements, regulatory approvals, geopolitical conditions, currency fluctuations, and our ability to secure contracts in foreign markets. Our relatively lower contribution from international markets in recent periods indicates our continued dependence on domestic operations. *For further details, please refer to the chapter titled “Business Overview” on page 107 of this Draft Prospectus.*

Any inability to expand or maintain our presence in international markets may limit our geographical diversification and growth opportunities. Consequently, our reliance on domestic markets may expose us to region-specific economic, regulatory, or industry-related risks, which could adversely affect our business, financial condition, and results of operations. While the Company has never faced such situations in the past, but cannot assure for the future.

18. *A portion of our business is derived from tenders, and our inability to successfully qualify for or secure such tenders may have an adverse effect on our business, financial condition and results of operations.*

A portion of our business is derived from contracts awarded through tender processes, and our inability to successfully qualify for or secure such tenders could have an adverse effect on our business, financial condition, and results of operations.

We regularly participate in tenders. These tenders represent a significant source of order inflow and contribute to our revenue visibility and growth prospects. The tendering process is inherently competitive and typically involves stringent eligibility criteria, including technical qualifications, prior experience, financial strength, statutory compliance, and adherence to specific project requirements.

Our success in securing such tenders depends on several factors beyond our control, including the number and capability of competing bidders, pricing pressures, client preferences, evolving procurement policies, and project-specific evaluation parameters. In many cases, contracts are awarded based on a combination of technical scoring and financial bids, requiring us to maintain a careful balance between competitiveness and profitability. Aggressive pricing strategies adopted by competitors may limit our ability to win bids without compromising margins.

Additionally, tender processes may be subject to delays, modifications, or cancellations due to administrative, regulatory, or budgetary considerations. Changes in tender terms and conditions, including more stringent qualification requirements or unfavorable contractual obligations, may also restrict our ability to participate or reduce the likelihood of success. Furthermore, there can be no assurance that previously successful bidding strategies will continue to remain effective in the future.

Any failure to pre-qualify, qualify, or secure tenders, or any significant reduction in the number of tender opportunities available to us, may adversely impact our order book, revenue generation, and overall business growth. This, in turn, could have a material adverse effect on our financial condition, cash flows, and results of operations.

19. *Our business is dependent on the availability and retention of qualified technical personnel, and our inability to attract or retain such personnel may adversely affect our operations.*

Our business operations as a third-party inspection and testing service provider require the services of qualified engineers, inspectors, auditors and other technical personnel who possess specialized industry knowledge, technical expertise and relevant certifications. The quality, accuracy and reliability of the inspection and testing services provided by us depend significantly on the competence, experience and professional judgment of such personnel.

Our technical staff are responsible for conducting inspections and audits, interpreting technical standards and specifications, operating testing equipment and preparing inspection reports in accordance with applicable industry standards and client requirements. Our ability to execute assignments efficiently, maintain service quality and meet client expectations is therefore largely dependent on the continued availability and retention of skilled and experienced personnel.

The market for experienced and qualified technical professionals is highly competitive and there is a limited pool of trained inspection professionals in the industry. Any inability to attract, recruit and retain suitably qualified personnel in a timely manner or on commercially acceptable terms may adversely affect our operational capacity. Further, the loss of key technical personnel or a high rate of employee turnover may disrupt our operations, cause delays in project execution and affect the quality and consistency of our services.

While the Company has never faced such situations in the past. Accordingly, any inability to attract, train and retain qualified technical personnel may adversely affect our business operations, financial condition and results of operations. For further details, please refer page no. 107 chapter titled “Business Overview” in the Draft Prospectus.

20. *Any misconduct, bias, inconsistency or failure to adhere to professional standards by our auditors or inspection personnel may affect the credibility of our services and adversely affect our reputation and business.*

Our inspection and certification services rely significantly on the integrity, objectivity and professional conduct of our auditors, inspectors and technical personnel. Any inadequacy in training, inconsistency in interpretation of standards, or lack of coordination among inspection personnel may affect the reliability and credibility of the inspection reports or certifications issued by us.

Further, there is an inherent risk in the inspection and certification industry that field personnel may be subject to bias, conflicts of interest or external influence from clients or other stakeholders. Any instance of improper conduct, including acceptance of inducements, issuance of certifications without proper inspection, or deviation from established procedures and professional standards, may adversely affect the credibility of our services.

We maintain internal policies, supervision mechanisms and a code of conduct that defines the principles of professional integrity expected from our employees as well as contractors, consultants, agents, subcontractors and other persons acting on behalf of the Company. However, there can be no assurance that such policies and controls will always be effective in preventing misconduct or operational errors. For further details, please refer page no. 107 in the chapter titled “Business Overview” in the Draft Prospectus.

While the Company has never faced such situations in the past, but Any such occurrence may result in reputational damage, loss of client confidence, contractual disputes or potential legal exposure, which may adversely affect our business operations, profitability, financial condition and results of operations.

21. *There have been instances of delay in filing of Goods and Service Tax returns (GST), ESI dues and other statutory dues.*

There have been instances of delay in filing ESI Returns, GST returns, in the past 3 years, which were due to initial technological issues with GST portal and slightly delay in receiving data from our sites. A wrong filing of GST return can lead to huge penalties and interest. Therefore, reconciliation and checking of returns before submitting them is necessary as there is no opportunity to make any changes afterward. Hence, there were delays in filing GST returns to include correct input from all stakeholders involved and making them error free. Company has filed and paid PF, professional tax and TDS return within the prescribed time limit. Though Professional Tax was Applicable to the Company, Professional Tax was not deducted from the salary of the employees during the period April 2022 to April 2024 and deposited with the Professional Tax Authorities, company may be liable to pay professional tax with interest and penalty to the Authorities in future, if such demand is made from the Authorities. There can be no assurance that such delays may not arise in future. There is a possibility of financial penalties being imposed on us by the relevant Government authorities, which may have a material adverse impact on our cash flows and financial condition. 22. Our Company obtained delay registration under the Professional Tax laws, which may expose the Company to regulatory action and financial liabilities.

Our Company was originally incorporated as “Gulf Lloyads Industrial Services (India) Private Limited” on September 26, 2014, as per the provisions of the Gujarat State Tax on Profession, Trade, Calling and Employment Act, 1976, entities are required to obtain necessary registrations, including the Enrollment Certificate (EC) and Registration Certificate (RC), within the prescribed timelines upon becoming liable under the said Act.

However, the Company had obtained its Professional Tax Enrollment Certificate (EC) bearing No. PEC010678002676 and Registration Certificate (RC) bearing No. PRC010678000423 on January 17, 2023, which indicates a delay in obtaining such registrations since incorporation and/or from the date on which the provisions became applicable to the Company. For further detail on the PT Certificates, please refer chapter titled “Government and Other Statutory Approvals” on page no 213 of the Draft Prospectus. The Company had not deducted and deposited Professional Tax from employees’ salaries for the period till April 2024. Such delays and non-compliances may constitute a violation of applicable statutory provisions.

Accordingly, the Company may be subject to notices, penalties, interest, or other actions from the relevant Professional Tax authorities for delayed registration, non-deduction, and non-payment of Professional Tax. The

extent of such liability, if any, cannot be ascertained with certainty at this stage. In the event that such liabilities materialize, it may result in additional financial outflows and could adversely affect the Company's financial condition, results of operations, and cash flows.

Further, any non-compliance with statutory requirements may subject the Company to regulatory scrutiny and could impact its reputation and standing with regulatory authorities. There can be no assurance that no proceedings or actions will be initiated against the Company in this regard in the future. Although, the Company has not received any penalties and notice from any authorities till date, but cannot assure for the future.

23. *Any default in repayment of borrowings or servicing of interest thereon, and any potential roll-over of such liabilities, may adversely affect our financial condition and operations*

As per the details of borrowings disclosed in our Restated Financial Statements refer page 158 of this Draft Prospectus, the Company has availed secured borrowings, including long-term vehicle loans and short-term working capital facilities from banks. As on September 30, 2025, the total secured borrowings of the Company aggregated to ₹755.27 lakhs, comprising both term loans and fund-based working capital facilities and unsecured long term borrowings of Rs. 200.61.

The Company is required to service its debt obligations, including repayment of principal amounts and payment of interest, in accordance with the terms and conditions of the respective loan agreements. Any failure or delay in servicing such obligations may result in penal interest, invocation of securities, recall of loans, or initiation of recovery proceedings by lenders, which could adversely impact the Company's financial condition, liquidity, and operations.

Further, the Company may, from time to time, rely on renewal, restructuring, or roll-over of its working capital facilities and other borrowings. Inability to obtain such renewals or roll-overs on favorable terms, or at all, may result in liquidity constraints and could have a material adverse effect on the Company's business and financial performance.

While the Company has not defaulted in repayment of its borrowings or payment of interest thereon in the past, there can be no assurance that such defaults will not occur in the future. Any such occurrence may adversely affect the Company's reputation, creditworthiness, and ability to raise further funds.

24. *We operate in a highly competitive industry and increased competition may adversely affect our market position, business operations and profitability.*

The third-party inspection, testing and certification industry in which we operate is highly competitive and fragmented. We face competition from a number of domestic as well as international service providers, including established inspection agencies, independent laboratories and large multinational companies that offer similar or broader service portfolios. Certain competitors may have significantly longer operating histories, stronger brand recognition, broader service networks, more advanced technological capabilities and greater financial, technical and marketing resources than we do.

These competitors may also have the ability to offer services at lower prices, bundle services across multiple geographies, or leverage long-standing relationships with large clients and government bodies. As a result, we may face challenges in retaining existing customers or attracting new clients, particularly in competitive bidding processes or large-scale inspection assignments.

Increased competition in our industry may result in pricing pressure, reduction in service fees, lower operating margins, or loss of existing contracts and business opportunities. Additionally, in order to maintain or expand our market share, we may be required to incur higher expenditures on marketing, business development, technological upgrades, expansion of our service network, recruitment of skilled personnel and improvement of service quality. There can be no assurance that such investments will yield the desired results.

Furthermore, new entrants, technological advancements, consolidation among competitors, or strategic alliances between market participants could intensify competition in the future. If we are unable to effectively compete with existing or new competitors, maintain service quality, or continue to offer competitive pricing and value-added services, our market position may weaken.

Any of the above factors could adversely affect our business operations, financial condition, results of operations and growth prospects.

25. The Company is dependent on a few suppliers for purchases of product/service. The loss of any of these service providers may affect our business operations.

Our top ten third-party service providers contributed **23.90%, 31.47%, 42.99% and 30.67%** of our total service procurement for **Fiscal 2023, Fiscal 2024, Fiscal 2025 and the stub period ended September 30, 2025**, respectively, based on our Restated Financial Statements. For further details, please refer to the chapter titled **“Restated Financial Statements”** on page 158 of this Draft Prospectus.

26. Our revenue from operations is dependent upon a limited number of customers and the loss of any of these customers or loss of revenue from any of these customers could have a material adverse effect on our business, financial condition, results of operations and cash flows.

We derive a significant portion of our revenue from a limited number of key customers. The table below sets forth our revenue derived from our top one (1), top five (5) and top ten (10) customers (the identities of which vary across the financial periods) for the Six months period ending September 30, 2025, Fiscal 2025, Fiscal 2024 and Fiscal 2023 respectively along with the corresponding percentage of our revenue from operations.

Our customer base includes companies that engage us for third-party inspection, testing, verification and other related services. Due to the nature of our business, certain customers contribute a relatively higher proportion of our revenue in a given financial period depending on the scale, duration and number of assignments awarded to us. Consequently, our revenue may be significantly influenced by the volume of inspection and related service assignments received from these customers during the relevant periods.

As reflected in the table below, revenue derived from our top customer accounted for 25.05%, 15.58%, 26.58% and 33.07% of our revenue from operations for the six-month period ended September 30, 2025, Fiscal 2025, Fiscal 2024 and Fiscal 2023, respectively. Further, revenue derived from our top five customers accounted for 73.07%, 47.70%, 82.72% and 59.96%, respectively, during the same periods, while revenue derived from our top ten customers accounted for 94.77%, 60.48%, 93.85% and 62.31%, respectively.

Although we have maintained business relationships with several of our customers and continue to seek opportunities to expand our client base, there can be no assurance that such customers will continue to engage our services in the future or that the level of business generated from such customers will remain consistent. The loss of any one or more of our key customers, a reduction in the volume of assignments awarded to us by such customers, or the inability to renew or secure new service contracts on commercially acceptable terms could adversely affect our revenue and profitability.

The loss of any one or more of such key customers for any reason including due to failure to negotiate acceptable terms of purchase order, contract renewal, negotiations, disputes with customers, adverse change in the financial condition of such customers, including due to possible bankruptcy or liquidation or other financial hardship, merger or decline in their sales, reduced or delayed customer requirements, or work stoppages could have an adverse effect on our business, results of operations and financial condition may also result in a decrease or delay in the demand for our services.

Any such reduction or loss of business from one or more of our key customers could have a material adverse effect on our business, results of operations, cash flows and financial condition.

27. *Our insurance coverage may not be sufficient or adequate to protect us against all risks, which may adversely affect our business, results of operations, financial condition and cash flows.*

Our Company maintains certain insurance policies that we consider appropriate for our business and industry. As of the date of this Draft Prospectus, we have obtained insurance coverage including Employee's Compensation Insurance and Professional Indemnity Insurance from ICICI Lombard General Insurance Company Limited. These policies are intended to cover certain risks associated with our operations, including statutory liabilities relating to employee injuries and claims arising from professional services rendered by the Company.

Our Company has obtained a Workmen's Compensation Insurance Policy from ICICI Lombard General Insurance Company Limited covering 555 worker lives, including a medical extension of up to ₹5,00,000 per person, for the relevant policy period. The primary coverage under this policy relates to the statutory liability of the Company under applicable workmen compensation laws in respect of employee injuries, disability or death arising out of and in the course of employment.

However, our existing insurance coverage may not be sufficient to cover all potential risks and liabilities associated with our operations. The workmen compensation policy primarily covers employee-related liabilities and does not provide coverage for several other business-related risks. In particular, our insurance may not cover potential claims that may arise from clients or third parties who rely on our inspection, testing, certification, or verification services. In the event that any client suffers losses or damages based on reliance upon our reports, certifications, or inspection services, such claims may result in litigation or liability against our Company which may not be fully covered by our existing insurance arrangements.

Further, there may be certain limitations associated with the extent of coverage under our workmen compensation insurance policy. The compensation payable in the event of loss of life or injury is calculated based on an assumed average salary of ₹15,000 per month, whereas the actual salary of certain employees may be higher than the salary considered for the purpose of insurance coverage. As a result, the insurance coverage may not be adequate to fully meet the compensation obligations that may arise under applicable laws or as determined by the competent authority.

Although our Company has not experienced any material claims, litigation or compensation liabilities in the past, there can be no assurance that such events will not occur in the future.

The details of our existing insurance policies are provided in the chapter titled Business Overview on page 107 of this Draft Prospectus.

We are rendering services to our foreign clients and part of our revenue consists of the foreign currency also. We are always subject to risks inherently associated with international operations, including risks associated with foreign currency exchange rate fluctuations, which may cause volatility in our reported income, and risks associated with the application and imposition of protective legislation and regulations of foreign policy or the variability of foreign economic conditions. Any fluctuations in foreign currency exchange rates may have direct impact on our profits, results of operations and cash flows and consequently on our business condition and profitability. We have not entered into any hedging arrangements to account for any adverse changes to the foreign currency exchange rate.

30. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

Our Directors have no experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a public company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted public company. Our Company will also be subject to the provisions of the listing related compliances which require us to file unaudited financial results on a half yearly basis and other yearly compliances. In order to meet our Company's disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Any of the lapses in regulatory compliances will lead the company to face the penal action including penalty.

31. *Our Company, Promoters and Directors may be subject to legal proceedings, claims or disputes in the future, which could adversely affect our business, financial condition and results of operations.*

We may be subject to legal proceedings, claims or disputes in the future, which could adversely affect our business, financial condition and results of operations.

Our Company operates in the business of providing inspection, testing, certification, verification and related technical services to various clients across different industries. In the ordinary course of our business, we may be exposed to the risk of legal proceedings, claims, disputes or regulatory actions initiated by clients, employees, contractors, vendors, regulatory authorities or other third parties.

Such claims may arise from various circumstances, including but not limited to alleged deficiencies or errors in inspection reports or certifications issued by us, contractual disputes, employee-related matters, workplace incidents, delays in execution of assignments, or disputes with customers, vendors or service providers. In particular, our clients may rely on the reports, certifications or verification services provided by us for their operational, regulatory or commercial purposes. Any allegation of negligence, error, omission or non-performance of contractual obligations may result in claims for damages or other legal actions against our Company.

Although as of the date of this Draft Prospectus there are no material litigation proceedings pending against our Company, promoters and directors there can be no assurance that we will not be involved in legal proceedings in the future. Any such litigation or dispute may result in financial liabilities, legal costs, diversion of management time and resources, reputational damage, or adverse orders or penalties.

Further, even if such claims are ultimately resolved in our favour, the costs associated with defending such proceedings and the potential impact on our reputation and client relationships may adversely affect our business operations, financial condition, cash flows and results of operations.

32. *Our Promoters/Directors have issued personal guarantees and/or mortgaged their property in relation to debt facilities availed by us, which if revoked, may require alternative guarantees, repayment of amounts due or termination of the facilities.*

In the event any of these guarantees are revoked or taken possession of mortgaged properties, then the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities. While we have not faced any revocation of such guarantees in the past, if any of these guarantees are revoked, our lenders may require alternative guarantees or collateral or cancellation of such facilities, entailing repayment of amounts outstanding under such facilities. Further we may not be successful in procuring alternative guarantees satisfactory to the lenders and as a result, may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition adversely. For further details, see "**Financial Indebtedness**" on page No. 201 of Draft Prospectus.

for approval.

Post this Issue, our Promoter and Promoter Group will collectively own [●] % of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. For further details, please refer to the chapter titled “Capital Structure” on page 62 of this Draft Prospectus.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

Although, we have obtained all material approvals required to carry on our business activities as on the date of this Draft Prospectus, most of these approvals are granted for a fixed period of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our operations, thereby having a material effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any or all such permits or approvals in the time-frame anticipated by us or at all. For details, please refer to the Chapter “Government and other Statutory Approvals” on page 213 of the Draft Prospectus.

Our Company's profitability, financial condition and results of operations may also be impacted due to lack of experienced and talented workforce. As we intend to continue to expand our operations and develop new avenues, we will be required to continue to attract and retain experienced personnel. There can be no assurance that our competitors will not offer better compensation incentives and other perquisites to such skilled personnel.

37. *We may not be able to successfully manage the growth of our operations and execute our growth strategies which may have an adverse effect on our business, financial condition, results of operations and future prospects.*

There can be no assurance that we will not suffer from capital constraints, operational difficulties or difficulties in expanding existing domestics and international business and operations and training an increasing number of personnel to manage and operate the expanded business. There can be no assurance that we will be able to successfully manage our growth, strategies or that our expansion plans will not adversely affect our existing operations and thereby have an adverse effect on our business, financial condition, results of operations and prospects.

Further, we could also encounter difficulties and delays in executing our growth strategies due to a number of factors, including, unavailability of human resources and professional experts, inability to develop adequate systems, getting necessary permissions from the concerned authorities, delayed payments or non-payments by clients, other unforeseen situations or difficulties may result in delay in the execution of our business in new segment as well as new geographical area. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients.

As on September 30, 2025, our total working capital borrowings stood at ₹ 1107.64 lakhs. We may incur additional indebtedness in the future. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Furthermore, the objects of the Issue include funding working capital requirements of our Company. For more information in relation to such management estimates and assumptions, please see “**Objects of the Issue**” on page no. 73 of Draft Prospectus. 41. Our Promoters, Directors and Key Managerial Personnel may have interests in our Company other than reimbursement of expenses incurred or normal remuneration, which may result in potential conflicts of interest.

Our Promoters, Directors and Key Managerial Personnel may be deemed to be interested in our Company to the extent of the Equity Shares held by them and the benefits arising from such shareholding, including dividends and other distributions that may be declared by our Company from time to time. Accordingly, their interests may differ from or may not always be aligned with the interests of our other shareholders.

Since these borrowings are unsecured in nature and repayable on demand, the respective lenders may require repayment of the outstanding amounts, either partially or in full, at any time. In the event that such lenders demand repayment and we are unable to arrange alternative sources of funding or generate sufficient internal accruals to meet such repayment obligations, it may adversely affect our liquidity, working capital position and ability to meet our operational requirements.

Further, the requirement to repay such unsecured loans at short notice may also compel us to divert funds from our business operations or seek additional borrowings on less favourable terms, which could have a material adverse effect on our business operations, financial condition, cash flows and results of operations.

For further details of these unsecured loans, please refer to the chapter titled “Financial indebtedness” beginning on page 201 of this Draft Prospectus.

Our Company has entered into such transactions due to easy proximity and quick execution. However, there is no assurance that we could have obtained better and more favourable terms than from transaction with related parties. Additionally, our company belief that all our related party transactions have been conducted on an arm’s length basis, but we cannot provide assurance that we could have achieved more favourable terms had such transactions been entered with third parties. Our Company may enter into such transactions in future also and we cannot assure that in such events there would be no adverse effect on results of our operations, although going forward, all related party transactions that we may enter will be subject to board or shareholder approval, as under the Companies Act, 2013 and the Listing Regulations. For details of transactions, please refer to “Annexure-V- Note No. 24” Related Party disclosures” on page no. 185 of Restated Financial Information.

Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of Listing Agreement. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the BSE.

45. *We have not identified any alternate source of financing for the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.*

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue which may delay in the implementation schedule and could adversely affect our growth plans. For further details of object of Issue and schedule of implementation please refer to the chapter titled “Objects of the Issue” on page no. 73 of this Draft Prospectus.

47. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

The proposed fund requirement, for funding our working capital requirements, expansion and part repayment of debt, primarily, as detailed in the chapter titled “Objects of the Issue” beginning on page no. 73 of this Draft Prospectus is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We, therefore, cannot assure that we would be able to execute our future plans/strategy within the estimated time frame.

48. *We have not independently verified certain data in this Draft Prospectus.*

We have not independently verified data from the industry and related data contained in this Draft Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

49. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised and may be subject to change based on various factors, some of which are beyond our control.*

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions and have not been appraised by any bank or financial institution or another independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be changed subject to the approval of shareholders by passing special resolution pursuant to section 27 of Companies Act, 2013 through postal ballot or subject to an authority given by the Company in general meeting by way of special resolution and based on various factors which are beyond our control. For further details, please see the section titled “Objects of the Issue” beginning on page no. 73 of this Draft Prospectus.

50. *Any future issuance of Equity Shares may dilute the shareholding of the Investor or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire post-Issue paid-up share capital, held by our Promoters or other shareholders will be locked-in 50% for a period of 1 (one) year and 50% for a period of 2 (two) year and minimum promoter contribution subject to a minimum of 20% of our post-Issue paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Issue, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled “Capital Structure” beginning on page no. 62 of this Draft Prospectus. Any future issuance or sale of

the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

- 51. *The issue price of the Equity Shares may not be indicative of market price of our equity shares after the issue and the market price of our Equity shares may decline below the issue price.***

The issue price of our Equity shares is decided on the basis of both qualitative and quantitative factors. The Company had made good progress in establishing its name in the readymade garment segment. All such points have been considered in deciding the issue price of the Equity Shares. Please refer chapter titled “Basis for Issue Price” beginning on the page no 89 of the Draft prospectus. The market price of our equity shares could be subject to change after the issue and may decline below the issue price.

- 52. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (ASM) and Graded Surveillance Measures (GSM) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.***

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria, such as significant variations in price and volume, concentration of certain client accounts as a percentage of combined trading volume, average delivery, and securities which witness abnormal price rise not commensurate with financial health and fundamentals, such as earnings, book value, fixed assets, net worth, price/earnings multiple, and market capitalization. Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors, which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, settlement on a trade-for-trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on a gross basis, or freezing of price on the upper side of trading, as well as mentioning our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on the market price, trading, and liquidity of our Equity Shares, and on the reputation and condition of our Company. For further details in relation to the ASM and GSM Surveillance Measures, including criteria for shortlisting and review of listed securities, exemptions from shortlisting, and frequently asked questions, among other details, refer to the websites of the BSE.

- 53. *Sale of shares by our promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

The sale of shares by the promoters or other significant shareholder(s) may significantly affect the trading price of our Equity shares. Further the market price generally may be adversely affected on account of the news about the sale of shares by the promoters. However, the closing of trading windows during the period of financial results may restrict the promoters from selling the shares in the open market.

- 54. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

- 55. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could

be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 56. *The Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.***

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

- 57. *There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

EXTERNAL RISK FACTORS

After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the stock exchange may fluctuate as a result of the factors, including:

- Volatility in the India and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors;
- Adverse media reports on Company;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

- 1. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

2. *Any changes in the regulatory framework could adversely affect our operations and growth prospects*

Our Company is subject to various regulations and policies. For details see section titled “*Key Industry Regulations and Policies*” beginning on page no. 126 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

3. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

4. *Major portion of Revenue is derived from business in India and a decrease in economic growth in India could materially affect and cause our business to suffer.*

We derive major portion of our revenue from our operations in India and, consequently, our performance and the quality and growth of our business are dependent on the health of the economy of India. However, the Indian economy may be adversely affected by factors such as adverse changes in liberalization policies, social disturbances, terrorist attacks and other acts of violence or war, natural calamities or interest rates changes, which may also affect the microfinance industry. Any such factor may contribute to a decrease in economic growth in India which could adversely impact our business and financial performance.

5. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed After Trade Broking Private Limited as Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

6. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include income tax and GST and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

Market Maker

Our Company and the Lead Manager have entered into an agreement dated September 11, 2025 with the following Market Maker, duly registered with BSE to fulfil the obligations of Market Making:

Aftertrade Broking Private Limited (formerly known as RCSPL Share Broking Pvt Ltd)

Address: 206, Time Square, Besides Pariseema Building, CG Road, Navrangpura, Ahmedabad - 380009

Tel. No.: +91 78019 18080

Email ID: compliance@aftertrade.in

Website: www.aftertrade.in

Contact Person: Mr. Tanmay Trivedi

SEBI Registration No: INZ000155638

BSE Member Code: 6669

Aftertrade Broking Private Limited (formerly known as RCSPL Share Broking Pvt Ltd) is registered with Platform of BSE as a Market Maker and has agreed to receive or deliver the Equity Shares in the market making process for a period of three (3) years from the date of listing of our Equity Shares or for a period as may be notified by any amendment to SEBI (ICDR) Regulations, 2018.

The Market Maker shall fulfill the applicable obligations and conditions as specified in the SEBI (ICDR) Regulations, 2018 and its amendments from time to time and the circulars issued by the BSE and SEBI regarding this matter from time to time.

Following is a summary of the key details pertaining to the Market Making arrangement:

1. The Market Maker(s) (individually or jointly) shall be required to provide a 2-way quote for 75% of the trading hours in a day. The same shall be monitored by the stock exchange. Further, the Market Maker(s) shall inform the exchange in advance for each and every black out period when the quotes are not being offered by the Market Maker(s).
2. The prices quoted by Market Maker shall be in compliance with the Market Maker Spread Requirements and other particulars as specified or as per the requirements of BSE Limited (SME platform of BSE) and SEBI from time to time.

3. The minimum depth of the quote shall be ₹2,00,000/-. However, the investors with holdings of value less than ₹2,00,000/- shall be allowed to offer their holding to the Market Maker in that scrip provided that he sells his entire holding in that scrip in one lot along with a declaration to the effect to the selling broker. The minimum lot size in the IPO is [●] Equity Shares subject to minimum two lots per application, thus, the minimum depth of the quote shall be such an amount that the minimum lot of [●] Equity Shares subject to minimum two lots per application is met, until the same is revised by Stock exchange.
4. The Market Maker shall not sell in lots less than the minimum contract size allowed for trading on the SME Platform (in this case currently the minimum trading lot size is [●] Equity Shares subject to minimum two lots per application of equity shares; however, the same may be changed by the SME Platform of stock exchange from time to time).
5. After a period of three (3) months from the market making period, the Market Maker would be exempted to provide quote if the Shares of Market Maker in our company reaches to 25% of Issue Size (including the [●] Equity Shares to be allotted under this Issue to the Market Maker). Any Equity Shares allotted to Market Maker under this Issue over and above 5% of Issue Size would not be taken into consideration of computing the threshold of 25% of Issue Size. As soon as the Shares of Market Maker in our Company reduces to 24% of Issue Size, the Market Maker will resume providing 2-way quotes.
6. There shall be no exemption/threshold on downside. However, in the event the Market Maker exhausts his inventory through market making process, the stock exchange may intimate the same to SEBI after due verification. Execution of the order at the quoted price and quantity must be guaranteed by the Market Maker(s), for the quotes given by him.
7. There would not be more than five (5) Market Makers for scrip of the company at any point of time and the Market Makers may compete with other Market Makers for better quotes to the investor.
8. The Market Maker shall start providing quotes from the day of the listing / the day when designated as the Market Maker for the respective scrip and shall be subject to the guidelines laid down for market making by the Exchange.
9. The Equity Shares of the Issuer will be traded in continuous trading session from the time and day the Issuer gets listed on BSE and Market Maker will remain present as per the guidelines mentioned under BSE Limited and SEBI circulars or amended from time to time.
10. The Market Maker shall not buy the Equity Shares from the Promoters or Promoter Group of the Issuer or any person who has acquired Equity Shares from such Promoter or Promoter Group, during the Compulsory Market Making Period.
11. The Promoters' holding of the Issuer which is locked-in shall not be eligible for offering to Market Maker during the Compulsory Market Making period. However, the Promoters' holding of the Issuer which is not locked in as per SEBI ICDR Regulations can be traded with prior permission of the BSE, in the manner specified by SEBI from time to time.
12. The LM, if required, has a right to appoint a nominee director on the Board of the Issuer any time during the Compulsory Market Making period provided it meets requirements of the SEBI (ICDR) Regulations, 2018.
13. The Market Maker shall not be responsible to maintain the price of the Equity Shares of the Issuer at any particular level and is purely supposed to facilitate liquidity on the counter of the Issuer via its 2-way quotes. The price shall be determined and be subject to market forces.
14. There will be special circumstances under which the Market Maker may be allowed to withdraw temporarily/fully from the market – for instance due to system problems, any other problems. All controllable reasons require prior approval from the Exchange, while withdrawal on account of force-majeure will be applicable for non-controllable reasons. The decision of the Exchange for deciding controllable and non-controllable reasons would be final.

15. The Market Maker shall have the right to terminate said arrangement by giving six months' notice or on mutually acceptable terms to the Lead Manager, who shall then be responsible to appoint a replacement Market Maker.
16. In case of termination of the above-mentioned Market Making agreement prior to the completion of the compulsory Market Making period, it shall be the responsibility of the Lead Manager to arrange for another Market Maker in replacement during the term of the notice period being served by the Market Maker but prior to the date of releasing the existing Market Maker from its duties in order to ensure compliance with the requirements of SEBI (ICDR) Regulations, 2018, as amended. Further, India is projected to reach a GDP of Rs. 4,26,45,000 crore (US\$ 5 trillion) by 2027 and is on course to surpass Germany by 2028. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Market Overview

India is home to 126 unicorns, with six new startups achieving unicorn status in 2025.

India's current account deficit moderated in Q2 FY 2025–26 (July–September), supported by a lower merchandise trade deficit. The deficit stood at Rs. 1.02 lakh crore (US\$ 11.7 billion), or 1.3% of GDP, compared with Rs. 1.73 lakh crore (US\$ 20.8 billion), or 2.2% of GDP, in the same quarter last year.

According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at Rs. 99,08,749 crore (US\$ 1.12 trillion) between April 2000-September 2025; with major share of FDI equity inflow, coming from Singapore at Rs. 13,21,127 crore (US\$ 186.82 billion) with a total share of 24.45%, followed by Mauritius at Rs. 11,22,807 crore (US\$ 183.66 billion) with 24.04%, the USA at Rs. 5,50,450 crore (US\$ 77.27 billion) with 10.11%, the Netherlands at Rs. 3,77,094 crore (US\$ 54.93 billion) with 7.19%, and Japan at Rs. 2,93,863 crore (US\$ 45.61 billion) with 5.97%.

On a month-on-month basis, investment value rose by 4% compared to Rs. 44,800 crore (US\$ 5.4 billion) in October 2025. Deal activity also strengthened, with the number of transactions increasing 12% year-on-year from 101 deals in November 2024 and 4% month-on-month from 109 deals in October 2025, reflecting sustained momentum in India's PE/VC investment landscape.
- During FY 2025–26 (up to January 27, 2026), Foreign Portfolio Investor (FPI) activity in India indicated a phase of portfolio optimisation and asset reallocation amid evolving global market conditions. While foreign investors moderated direct equity exposure, debt instruments continued to attract investments of over Rs. 2,100 crore (US\$ 0.25 billion), supported by stable macroeconomic fundamentals and policy continuity. FPIs also channelled Rs. 17,025 crore (US\$ 2.0 billion) into mutual fund schemes, reflecting a preference for diversified and professionally managed market exposure. Domestic Institutional Investors (DIIs) played a stabilising role in the equity cash market during FY 2025–26 (April–December 2025), recording net purchases of around Rs. 5.99 lakh crore (US\$ 66.55 billion). Strong and consistent buying by mutual funds, insurance companies, and pension funds helped offset periods of foreign portfolio moderation.
- India's manufacturing sector continued to expand in December, with the seasonally adjusted HSBC India Manufacturing Purchasing Managers' Index (PMI) remaining firmly in expansionary territory at 55.0, despite easing from 56.6 in November. Importantly, the index stayed above its long-run average, indicating sustained improvement in overall sector health. New orders continued to rise at a strong pace, supported by steady domestic demand, while output growth, although moderating, reflected ongoing capacity utilisation.
- India's consumer price inflation remained subdued and well-anchored in December 2025, reflecting a stable price environment across the economy. Headline inflation, based on the All-India Consumer Price Index (CPI), stood at 1.33% year-on-year, indicating continued moderation in price pressures. The marginal month-on-month uptick of 62 basis points from November 2025 reflects normal seasonal movements, while overall inflation remained comfortably low, underscoring effective supply management and macroeconomic stability.
- India's GST collections continued to demonstrate underlying revenue resilience, supported by steady economic activity and compliance levels. Total Net GST revenue in December 2025 stood at Rs. 1.45 lakh crore (US\$ 16.17 billion), reflecting normal month-on-month variation. On a cumulative basis, net yearly GST collections in December 2025 reached Rs. 14.25 lakh crore (US\$ 163.59 billion), registering a year-on-year growth of 6.8%, underscoring sustained consumption momentum and the strengthening tax base.
- Passengers carried by domestic airlines during January-November 2025 were 1526.35 lakhs as against 1464.02 lakhs during the corresponding period of the previous year, thereby registering an annual growth of 4.26% and a monthly growth of 6.92%.
- The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed

to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

- India secured 38th position out of 139 economies in the Global Innovation Index 2025. India rose from 81st position in 2015 to 38th position in 2024. India ranks in 3rd position in the global number of scientific publications.
- India's industrial activity witnessed a strong rebound in November 2025, with the Index of Industrial Production (IIP) growing by 6.7%, a sharp improvement from 0.4% in October 2025, indicating accelerating industrial momentum. The manufacturing sector led this expansion with a robust 8.0% growth, supported by positive performance across 20 out of 23 industry groups at the NIC two-digit level, reflecting a broad-based recovery. Key growth drivers included basic metals (10.2%), pharmaceuticals and medicinal products (10.5%), and motor vehicles and trailers (11.9%), highlighting strength in core, healthcare, and mobility-related industries. Overall, the IIP index rose to 158.0, up from 148.1 in November 2024, underscoring sustained expansion in India's industrial base.
- The government has set a calibrated wheat procurement target of 30 million tonnes for the 2025–26 rabi marketing season, ensuring efficient stock management and smooth market operations. This comes even as wheat production is projected at a record 115 million tonnes in 2024–25, reflecting strong output prospects. To support farmers, the MSP for wheat has been fixed at Rs. 2,425 per quintal, with procurement to be undertaken by FCI and state agencies to meet food security and welfare requirements.

SERVICES SECTOR IN INDIA

The expansion of India's services sector has been closely linked to the economic reforms of the 1990s. While the sector began to grow in the mid-1980s, it gained significant momentum after India initiated a series of structural reforms in response to a severe balance of payments crisis. Today, the services sector is not only the largest contributor to India's GDP but also a major driver of employment, foreign investment, and exports. It encompasses a wide range of activities, including trade, hotels and restaurants, transport, storage and communication, finance, insurance, real estate, business services, community and personal services, and services associated with construction.

To enhance India's share in the global services market from 3.3% and enable multi-fold growth in GDP, the government has implemented several initiatives to strengthen commercial services exports. As a result, India's services exports stood at approximately Rs. 20,40,317 crore (US\$ 237.55 billion), while imports were Rs. 10,20,974 crore (US\$ 118.87 billion), highlighting India's strong position in global trade. The services trade surplus of Rs. 10,19,343 crore (US\$ 118.68 billion), up from Rs. 8,71,698 crore (US\$ 101.49 billion) in FY25 (April-October 2024).

India's services sector has steadily increased its share of Gross Value Added, rising from 50.6% in FY14 to about 55.3% in FY25, with an average growth of 8.3% since FY23. The sector also ranked first in attracting Foreign Direct Investment, according to data from the Department for Promotion of Industry and Internal Trade. India's unique skills and competitive advantage in knowledge-based services, supported by initiatives such as Smart Cities, Clean India, and Digital India, have created a conducive environment for growth and innovation.

The Confederation of Indian Industry has outlined a plan to position India as a global logistics hub, emphasizing collaboration among stakeholders to unlock opportunities across industries and regions. This initiative aims to create aspirational career paths, facilitate professional development, and cultivate leadership opportunities. Positive demand trends in the sector have driven growth in new business volumes and further job creation, with the gig economy comprising 12 million workers, over 2% of the workforce, growing at a 17% CAGR and posting a 38% YoY increase, fuelled by digital connectivity, urbanization, and flexible work preferences.

Global agencies have recognized India's growth trajectory. The World Bank forecasted India's GDP between 6.3%-6.5% for FY26, owing to increased government spending on infrastructure and rising household investment in real estate as key drivers. With a growing services trade surplus, rising employment in knowledge and gig-based work, and continued government support, India's services sector is poised to unlock multi-trillion-dollar opportunities, stimulating sustained economic growth both domestically and globally.

Market Size

The services industry performed strongly in FY26 (April to June 2025), driven by robust export demand and record hiring. In FY25, the sector generated nearly three jobs for every one created in manufacturing, reinforcing its position as the primary driver of employment. It now employs approximately 182 million people, with major contributions from trade, transport, education, finance, and healthcare.

India's sustainable tourism market is projected to grow significantly over the next decade, reaching Rs. 1,851 crore (US\$ 216 million), up from Rs. 317 crore (US\$ 37 million) in April 2025, according to the Founder and Chairman of MakeMyTrip, Mr. Deep Kalra. This growth reflects increasing domestic and international interest in eco-friendly travel and experiential tourism.

The Ministry of Health and Family Welfare (MoHFW) is leveraging artificial intelligence (AI) to strengthen public health services across the country. In the healthcare sector, the telemedicine market is also expanding rapidly, reaching Rs. 31,191 crore (US\$ 3.64 billion) in 2025 and projected to rise to Rs. 90,660 crore (US\$ 10.58 billion) by 2030, driven by growing demand for remote consultation and digital healthcare solutions.

Connectivity in remote regions is improving, particularly in the Northeastern Region, where as of June 2025, 42,093 out of 45,934 villages now have mobile access, including 40,663 with 4G coverage. This expansion was supported by 2,485 towers commissioned under the Digital Bharat Nidhi program, extending services to remote and border areas.

Financial inclusion is also being strengthened through the expansion of Digital Banking Units (DBUs). The Government of India plans to nearly double the number of DBUs to 200 by the end of FY26, enabling them to offer a broader range of financial products, including insurance and pension schemes, to underserved populations.

This multidisciplinary expertise enables the Company to effectively undertake inspection, testing and certification assignments across diverse industry sectors.

The Company focuses on deploying experienced personnel in key operational roles to ensure efficient project execution. Projects are carried out under the supervision of experienced Project Managers and Technical Managers who oversee compliance with established quality procedures, client specifications and project timelines.

Professionals coordinate with inspection teams, clients and laboratories to maintain consistency, accuracy and reliability across various stages of project execution. By continuing to develop and strengthen its technical

workforce, the Company aims to enhance service quality, improve operational efficiency and support the expansion of its service offerings.

5. Focus on Continuous Employee Training and Skill Development

The Company places emphasis on continuous learning and capability building of its workforce through the implementation of both internal and external training programs. These programs are designed to enhance employees' technical skills, professional knowledge, safety awareness and overall job performance, enabling them to effectively perform their roles and responsibilities.

The training initiatives may include operational, technical, safety and compliance-related programs, conducted either through internal resources or with the support of external experts and institutions, depending on the nature and requirements of the training. Such initiatives assist the Company in maintaining a skilled workforce capable of meeting evolving industry standards and project requirements.

By investing in employee development and structured training programs, the Company aims to strengthen operational efficiency, improve workplace safety practices and enhance the overall quality of services delivered to its clients.

6. Nationwide and Regional Reach

The Company manages its operations across several regions in India, with its head office based in Ahmedabad. It supports its activities through head office that are positioned to handle client requirements without delay. The Company takes up assignments in different states and union territories, including remote project sites, allowing it to remain accessible and responsive to varied operational needs.

This spread of locations helps the Company deploy trained personnel and testing resources quickly, which reduces travel time, limits idle periods, and improves project turnaround. The regional network also gives the Company a solid operational platform for pursuing new opportunities and enables it to participate in large infrastructure and industrial projects across the country.

7. Quality and Compliance-Driven Processes

The Company maintains a robust **Quality Management System (QMS)** aligned with ISO 9001 and ISO/IEC 17020 standards. Every inspection, test, and audit follows a defined process for planning, execution, review, and reporting to ensure transparency, accuracy, and traceability. Internal audits, document reviews, and management evaluations are conducted periodically to assess system effectiveness and implement continual improvement measures. The Company's emphasis on quality and procedural compliance ensures that all services meet or exceed client expectations while conforming to statutory and regulatory requirements.

OUR BUSINESS STRATEGIES

1. Strengthen Presence Across Key Sectors and Regions

The Company plans to grow its footprint by reaching more sectors and geographical areas where demand for inspection, verification, auditing, testing, training, and certification services is increasing.

Right now, the Company already works in several core sectors—such as infrastructure, power, oil and gas, manufacturing, utilities, transportation, and industrial projects. The goal is to deepen involvement in these sectors while also entering related areas where similar compliance and inspection needs exist.

By expanding into more states and union territories, the Company positions itself to serve a wider client base. This includes emerging industrial corridors, new infrastructure projects, logistics zones, urban development programs, and energy-related clusters where large-scale work is underway.

Greater regional coverage also allows the Company to compete for assignments that require local presence—something many government and public sector tenders consider essential. It also supports large clients who operate multiple sites and prefer service providers with nationwide availability.

In short, this strategy is about being accessible, responsive, and geographically relevant so the Company can secure more assignments, reduce operational gaps, and build a stronger national presence.

2. Enhance Technical Capabilities and Service Portfolio

The Company intends to strengthen its technical capabilities by expanding the scope of services offered across inspection, testing, auditing and certification activities. With evolving industry practices, technological developments and changing regulatory frameworks, clients increasingly require service providers capable of addressing updated compliance requirements, material specifications, safety standards and operational guidelines. In order to address such requirements, the Company proposes to introduce additional service offerings aligned with applicable sectoral standards and project requirements.

As part of this strategy, the Company may upgrade its testing methodologies, adopt improved inspection techniques and implement updated audit frameworks in line with applicable national and international standards. This may include the adoption of advanced tools and equipment, revised sampling procedures, enhanced documentation practices and improved reporting systems.

Further, the Company intends to apply for accreditation from the National Accreditation Board for Testing and Calibration Laboratories (NABL) in the near future, which may enable it to undertake certain testing services directly in accordance with recognized laboratory standards. Subject to obtaining such accreditation and based on business requirements, the Company may expand its testing capabilities and service offerings.

Through the expansion of its technical capabilities and proposed accreditation, the Company aims to support clients across multiple stages of project execution, including procurement, fabrication, installation, commissioning and operational monitoring, while remaining aligned with requirements prescribed by regulatory authorities, accreditation bodies and project owners.

3. Invest in Workforce Training and Skill Development

The Company plans to strengthen the competency of its technical workforce by implementing a structured approach to training and skill development. Since its services depend on accurate inspection, verification, auditing, testing, and certification activities, maintaining a trained and updated team is essential for meeting client and regulatory requirements.

As part of this strategy, the Company intends to conduct periodic training sessions covering new standards, revised procedures, updated inspection methods, and sector-specific compliance requirements. Refresher programs will be organized to reinforce existing skills and ensure uniform application of procedures across different project sites.

The Company also aims to introduce focused skill-development initiatives for roles that require specialized knowledge, such as equipment inspection, material testing, safety assessments, and documentation review. These programs will help employees stay familiar with industry practices, emerging technologies, and changes in regulatory frameworks.

By continuously developing its workforce, the Company seeks to maintain consistent service quality, support complex or large-scale assignments, and ensure that its technical teams remain prepared to meet the expectations of clients, accreditation bodies, and project authorities.

4. Improve Systems, Processes, and Quality Management

The Company plans to strengthen its internal systems and operational processes to support consistent and reliable execution of its services. Since inspection, verification, auditing, testing, and certification activities rely on structured workflows, clear documentation, and traceable records, the Company intends to place continued emphasis on process development and quality oversight.

As part of this strategy, the Company will conduct periodic internal audits to review compliance with established procedures and identify areas where corrective or preventive measures are required. These audits will cover field activities, reporting practices, data management, documentation accuracy, and adherence to project-specific requirements.

The Company also expects to update and refine its documentation formats, reporting structures, and communication protocols so that information captured during assignments remains clear, complete, and traceable. Enhancing documentation practices will support transparency in service delivery and assist in meeting client, statutory, and accreditation requirements.

In addition, the Company intends to update its Quality Management System in line with changes in applicable standards, regulatory guidelines, and industry expectations. These updates will help maintain alignment with ISO-based frameworks and support consistent execution across all operational units.

By strengthening process controls and service workflows, the Company aims to reduce operational gaps, improve monitoring of field activities, and ensure uniform application of procedures across all inspections, verifications, audits, and certification assignments.

5. Deepen Relationships with Government and Public Sector Clients

The Company intends to further strengthen its engagement with central and state government departments, statutory authorities, and public sector undertakings, which form a significant part of its client base. These entities undertake large-scale development, procurement, and infrastructure programs that require continuous inspection, verification, auditing, testing, and certification support. The Company aims to maintain an active presence in these segments by aligning its services with the procedural and compliance requirements applicable to public projects.

To secure recurring assignments, the Company plans to participate in long-term empanelments, framework agreements, and tender-based selection processes issued by government and public sector clients. This includes meeting eligibility norms, technical criteria, and documentation standards required for each tender or empanelment cycle.

The Company also intends to focus on timely delivery of project-specific reports and adherence to quality norms prescribed by project authorities. By ensuring compliance with audit protocols, inspection guidelines, safety requirements, and material verification standards, the Company aims to maintain continuity of work with these clients.

Strengthening these relationships supports stable assignment flow, creates visibility across large project networks, and positions the Company to participate in upcoming programs initiated by government and public sector institutions.

COMPETITION

The Company operates in the third-party inspection (“TPI”) services sector, which is competitive and includes the presence of both multinational and domestic inspection agencies offering similar services across various industries such as infrastructure, manufacturing, engineering and energy. Market participants provide inspection, verification, testing and certification services to ensure compliance with technical specifications, contractual requirements and applicable quality standards.

Competition in the TPI industry arises from established international inspection organizations as well as domestic and regional inspection service providers that operate in specific sectors or geographical markets. In addition, certain engineering consultants, testing laboratories and technical service providers also offer inspection and quality assurance services, thereby contributing to the competitive landscape.

A substantial portion of third-party inspection assignments, particularly those relating to infrastructure projects such as roads, water supply systems and energy projects, are awarded through competitive tendering processes by government authorities, public sector undertakings and private sector clients. As a result, companies compete based on their technical qualifications, relevant project experience, availability of qualified inspectors, and compliance with recognized inspection standards such as ISO 17020.

The industry is also characterized by pricing competition, as service providers often bid competitively to secure inspection assignments, particularly in tender-based projects. Additionally, companies compete on factors such as service reliability, turnaround time for inspection reports, ability to deploy inspectors at project sites, and the range of inspection services offered.

Further, the availability and retention of qualified engineers, inspectors and technical professionals is an important factor in the industry. Skilled personnel may move between companies within the sector, including to competing service providers, which can intensify competition for experienced manpower. Companies that are able to maintain technical expertise, retain skilled professionals and deliver consistent quality services are generally better positioned to compete in the third-party inspection market.

INSTALLED CAPACITY AND CAPACITY UTILISATION

As our company operates in the service sector, metrics such as capacity and capacity utilization are not applicable to our business model.

The Company has a dedicated marketing team responsible for business development and client engagement, which focuses on identifying new business opportunities, participating in tender-based assignments and expanding the Company's presence across relevant industry sectors.

The Company regularly participates in open tenders issued by government departments, public sector undertakings, and large private organizations for third-party inspection, auditing, testing, and certification assignments. Through this process, the Company submits technical and financial bids in accordance with tender requirements to secure contracts for inspection and quality assurance services.

A portion of the Company's business is supported by long-standing professional relationships developed over time. The promoters have been associated with the inspection and quality assurance sector since 2011, and such relationships have contributed to repeat assignments and referrals from existing clients and industry contacts. The Company also utilizes digital marketing initiatives to enhance its market visibility and reach potential clients across various sectors. Through online platforms and digital communication channels, the Company seeks to promote its third-party inspection services and engage with prospective clients requiring independent inspection and quality assurance solutions.

As part of its marketing strategy, the Company aims to position itself as an independent third-party inspection ("TPI") service provider by emphasizing its technical capabilities, specialized inspection services and cost-effective service offerings. The Company also highlights its compliance with internationally recognized inspection standards such as ISO 17020, which supports its credibility as an independent inspection agency.

The Company primarily focuses on sectors such as manufacturing, engineering and export-oriented industries where independent inspection, quality verification and compliance with applicable standards are essential.

2 to 5 years	17.49	13.21	9.21	6.55
6 to 10 years	28.94	25.80	18.57	13.77

G. Characteristics of defined benefit plans and risks associated with them:

Valuation of defined benefit plan are performed on certain basic set of pre-determined assumptions and other regulatory framework which may vary over time. Thus, the Company is exposed to various risks in providing the above benefit plans which are as follows:

a. Actuarial Risk:

It is the risk that benefits will cost more than expected. This can arise due to one of the following reasons:

- Adverse Salary Growth Experience: Salary hikes that are higher than the assumed salary escalation will result into an increase in Obligation at a rate that is higher than expected.
- Variability in mortality rates: If actual mortality rates are higher than assumed mortality rate assumption then the Gratuity Benefits will be paid earlier than expected. Since there is no condition of vesting on the death benefit, the acceleration of cashflow will lead to an actuarial loss or gain depending on the relative values of the assumed salary growth and discount rate.
- Variability in withdrawal rates: If actual withdrawal rates are higher than assumed withdrawal rate assumption then the Gratuity Benefits will be paid earlier than expected. The impact of this will depend on whether the benefits are vested as at the resignation date.

b. Investment Risk:

For funded plans that rely on insurers for managing the assets, the value of assets certified by the insurer may not be the fair value of instruments backing the liability. In such cases, the present value of the assets is independent of the future discount rate. This can result in wide fluctuations in the net liability or the funded status if there are significant changes in the discount rate during the inter-valuation period. In case of the company, this risk doesn't arise as the plan is unfunded.

c. Liquidity Risk:

Employees with high salaries and long durations or those higher in hierarchy, accumulate significant level of benefits. If some of such employees resign/retire from the company there can be strain on the cashflows.

d. Market Risk:

Market risk is a collective term for risks that are related to the changes and fluctuations of the financial markets. One actuarial assumption that has a material effect is the discount rate. The discount rate reflects the time value of money. An increase in discount rate leads to decrease in Defined Benefit Obligation of the plan benefits & vice versa. This assumption depends on the yields on the corporate/government bonds and hence the valuation of liability is exposed to fluctuations in the yields as at the valuation date.

e. Legislative Risk:

Legislative risk is the risk of increase in the plan liabilities or reduction in the plan assets due to change in the legislation/regulation. The government may amend the Payment of Gratuity Act thus requiring the companies to pay higher benefits to the employees. This will directly affect the present value of the Defined Benefit Obligation and the same will have to be recognized immediately in the year when any such amendment is effective.

Foot notes explaining reasoning for variances in above ratios:

(i) There are no major change in Current ratios of the company except sharp increase during the year ended March 31, 2025. The same is mainly on account of increase in trade receivables as the company has started serving to various corporate customers under long-term inspection service contracts.

(ii) Uneven changes in Debt-Equity as well as Return on Capital Employed Ratios of the company, is mainly on account of increase / decrease in borrowings of the company. During the year ended March 31, 2024, the company has obtained total borrowings of Rs. 631.50 Lacs which has increased the finance cost of the company. Some portion of the same has been repaid during the year ended March 31, 2025 as well as during the period ended September 30, 2025. The company's profitability and equity are increasing consistently on yearly basis which contributed in reduction of Debt-Equity Ratio & increase in Return on Capital Employed Ratio during the year ended March 31, 2025.

(iii) Debt-Service Coverage Ratio is decreasing majorly on account of increase in borrowings & finance costs of the company.

(iv) There are uneven changes in Return on Capital Employed, Return on investment and Net Profit Ratio as the profitability depends upon two things i.e. Long-term Corporate Contracts and the cost of permanent staff / external labour.

During the year ended March 31, 2025; the company employed more number of permanent staff for servicing to its customers as compared to hiring Free-lancers / Labourers / Man-power Suppliers in previous years which in-turn increase the profit margins in the service contracts for the company.

During the 1st half year ended September 30, 2025; the company's revenue & profitability has decreased as it is slack season (i.e. difficulty arises in accessing the cheap labour on account of hot summer & monsoon weather season in India). Generally, company earns higher profitability in second-half of the year i.e. during winter weather season.

(v) Inventory turnover ratio is not applicable as the company is into Inspection Services and doesn't own inventory at any reporting date.

(vi) There are uneven changes in net capital turnover ratio which is mainly on account of uneven requirements of the working capital facilities. Company's revenues and profitability depend upon regular execution of Long-term Govt. / Corporate Inspection Contracts which necessitate the uneven working capital needs by the company.

(vii) Trade receivable turnover ratio is decreasing as the average trade receivables of the company is increasing consistently. Which is mainly on account of change in service model of the company. In recent years the company has started taking long-term corporate contracts under which the full collection from the corporate customer will be received at the end of the contract. On account of which company's revenue as well as trade receivables are increasing.

(viii) Trade payables turnover ratio is increasing as the average trade-payables of the company is decreasing consistently. Which is mainly on account of change in service model of the company. In recent years the company has started employing more number of permanent staff for servicing to its customers as compared to hiring Free-lancers / Labourers / Contractors in previous years which in-turn decrease the trade payables for the company.

(ix) Ratios for the period ended September 30, 2025 are annualised to ensure consistent disclosure of numbers as compared to previous full years covered by these restated financial statements.
